

## Dice Coefficients

ds000001

ds000109

ds000120

### Positive Activation Dice Coefficients

### Negative Activation Dice Coefficients

**Figure 2**

Dice coefficients comparing the thresholded positive and negative T-statistic maps computed using each software package and inference method for each of the three reproduced studies. Only one software – FSL parametric – obtained a result for decreases in ds000109, and hence no Dice coefficients are shown.
